

POWERFUL NEIGHBORHOODS

Electric upgrades for your home or business

Powerful Neighborhoods is helping communities transition from natural gas to energy-efficient electric appliances, such as space heating, cooling, and water heating. This program is designed to create more sustainable, comfortable, and energy-efficient homes and businesses. By investing in a cleaner future, we are assisting homes and businesses in upgrading to modern, all-electric appliances—**at little to no cost**.

Get started at powerfulneighborhoods.com

Who can participate?

To qualify, your residence or business must be located in a program neighborhood. Check your eligibility on powerfulneighborhoods.com.

What will it cost?

- **Residents of single family and small multifamily (2-4 units) homes:** Your electric home upgrade is FREE! All costs are covered by Powerful Neighborhoods.
- **Business owners:** Powerful Neighborhoods will cover 80% of project costs. You will receive a detailed **Project Plan** that outlines these costs before you make a decision.

What will I get?

Every home or business will receive a customized **Project Plan** with recommended **improvements that may include:**

- Induction stove
- Heat pump (for heating and cooling)
- Water heating
- Insulation
- Duct sealing
- Electrical panel upgrades

All projects in your neighborhood must proceed together. After you review and approve your **Project Plan**, all other homes and businesses in your neighborhood must do the same before any work can begin.
